PROFESSIONAL EXPERIENCE

Makerspace Innovhub | Prompt Engineer Intern | Mapandan, Pangasinan   Mar 2023 – June 2023

- Designing and developing hundreds of prompts and completions for conversational AI used in auto repair services.
- Fine-tuning the system foundation data model to improve the accuracy and efficiency of the conversational AI system in eliciting the desired response from the user.
- Conducting extensive unit testing to improve the prompts' for better performance.

PROJECTS

CovBot (Academic Project)

- Developed a web application called COVID-19 chatbot for assessing patients' risk of virus infection and directing them to the right treatment (**JavaScript, PHP, MySQL, HTML, CSS**).

Mang Macs Landing Page (Academic Project)

- Created a responsive website landing page for Mang Mac's Marinero's Pizza House located at Brgy. Sta. Lucia, Bypass Road, Urdaneta City, Pangasinan (**JavaScript, HTML, CSS**).

Mang Mac's RMS (Final Year Project)

- Developed the overall web application for managing orders, reservations, inventory, menus, and order history. It handles the customer's order and table reservation from the **TapAndEat** Android application, an online food ordering app (**JavaScript, PHP, MySQL, HTML, CSS, Java, Retrofit2 API**).
